Fig.1a) In vitro proliferation in RPMI medium of (L0) spleen cells stimulated with IL-18 transfected tumor cells for 5 days

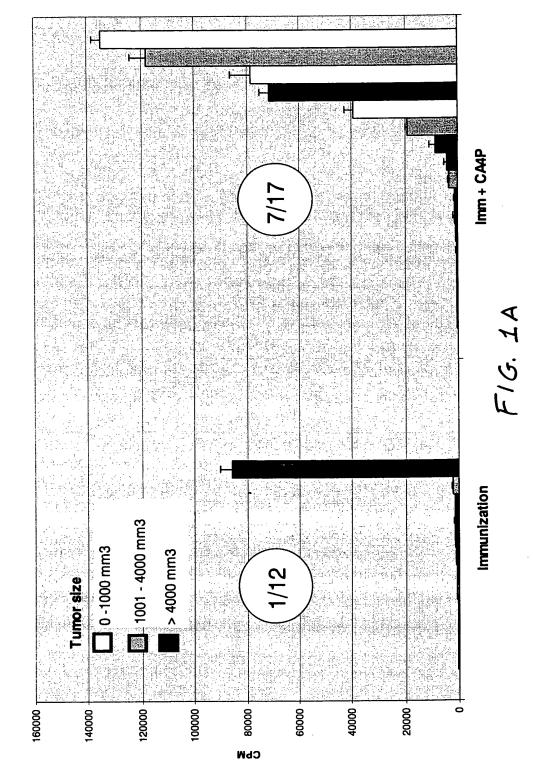

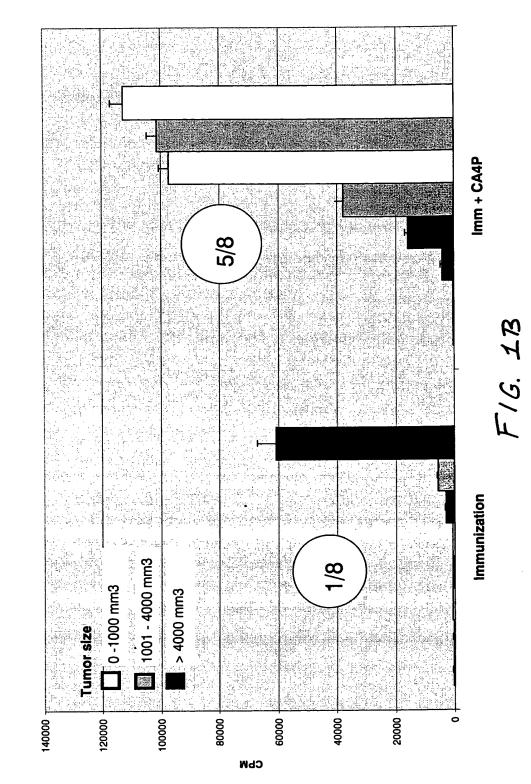

Fig.1b) In vitro proliferation in RPMI medium of (L0) spleen cells stimulated with 0.1 ng SEA for 3

Effect of CA4-P low dose treatment of tumor-bearing rats subjected to vaccinations with tumor cells producing IL-18 on spleen cell proliferative response in vitro to wild type tumor (H1D2-WT) or IL-18 transfectant (H1D2-IL-18) stimulator cells.
